PEA APHID (Illinoia pisi Kalt.)

Telegraphic communication has just been received  
from Prof. Leonard Haseman of Missouri, to the effect that  
the pea aphid is seriously damaging alfalfa from Kansas City  
to Booneville, covering practically the western half of Missouri.  
A similar condition was reported last month from Topeka, Kansas.

## YESTERDAY'S NEWS RECAP

With a solid performance in the mud  
Qualifying, we're in pole position for Q1.

It's been a great day for the team, and I'm looking forward to tomorrow's race.

## (Q1) 10:15 AM LOCAL TIME

Qualifying has been a bit of a mixed bag. We've had some really good runs, but also some really bad ones. I think we're still in pole position, but we'll have to work hard to make sure we can hold onto it. The track is very unpredictable, so we'll just have to stay focused and do our best. I'm excited to see what tomorrow brings.
